

Getting started

Installation of **R**

You can download the most recent version of **R** (for Windows) from the home page <http://www.r-project.org>.

The setup **exe** file can be obtained directly from the home page

<http://mirrors.dotsrc.org/cran/bin/windows/base/release.htm>

Store the **exe** file somewhere on your computer and then run it to have **R** installed via a setup wizard.

Installation of **drc**

You can download the most recent version from the home page <http://www.bioassay.dk>.

Store the **zip** file (for Windows) containing the package **drc** on your computer. Installation of **drc** is done through the '*Packages*' menu within **R**. Choose '*Install package(s) from local zip files*' and supply the location of the stored **zip** file.
